

Economy Days

SAVINGS FOR SHOPPERS

The Sanders-Wright Store has eight big departments, each as large in itself as an ordinary specialty store. We have set aside certain days in which to exploit different departments. During these days everything possible is done to call your attention to that department--special advertising, window trims, ledge displays and an energetic price campaign--efforts that are intended to win from you a lasting and favorable impression of that section of our store.

Monday, May 2nd to Saturday, May 7th, Will Be

Dress Goods Week

This is one department in which we take especial pride. The amount of money expended each season in our dress goods section makes it necessary to sell more goods than ever before. Our purchases are almost double--consequently we have an immense stock to dispose of. A magnificent showing of silks, batistes, serges, silk grenadines, voiles, panamas, linen suitings, waistings, gingham, percales, prints, muslins--in fact every fabric known and used for garments as decreed by "Dame Fashion" for 1910.

2500 Yards "Lotus" Lawns

In all colors and color combinations. Lotus lawns are fast color fabrics 27 inches wide and make beautiful summer dresses--are equal in looks and durability to lawns costing twice the money. As long as the lot of 2500 yards last it goes at the yard. **5c**

2000 Yards of 12 1-2c Hope Muslin 10c

Hope bleached muslin is 36 inches wide and is probably the most satisfactory and biggest seller of any high grade muslin on the market. Hope muslin is finished and bleached by the Lonsdale Mills of Providence, R. I., and at the present price of cotton is a good 12 1-2c value and retails at that price in most stores. EXPERT MEDICAL TESTIMONY GIVEN

Dr. Hall Testified That All of Swope's
Vital Organs Were Normal--
Believed Death Natural.

By Associated Press.

Kansas City, Mo., April 30. -- Answering the hypothetical question relating to the deaths of Col. Swope and Chrisman Swope, Dr. Hektoen, the Chicago pathologist, said in the criminal court today that in his opinion both men died from the effect of some convulsive, paralyzing poison. Cyanide of Potassium, testified the scientist, was such a poison. Shortly before noon, Walsh began his cross examination of the witness, his earliest efforts were directed toward an attempt to show that Hektoen was a professional expert witness and worked much in conjunction with the corner's office in Chicago. The witness denied such as being the case.

With the calling of Dr. Frank Hall, a pathologist to the witness stand Friday the Hyde murder case entered into the vital and complicated realm of expert medical testimony.

Dr. Hall assisted Dr. Ludwig Hektoen of Chicago, in making the autopsy on Col. Swope's body on January 11, and later conducted the investigation to determine, if possible, the course of the typhoid fever epidemic in the Swope residence.

Dr. Hall said the vital organs of Col. Swope were in an almost normal condition and there was nothing in them which he believed accounted for his death from natural causes. He did not think that Col. Swope died from natural causes.

Prompted by Dr. Hyde's attorney Frank P. Walsh, cross-examined the witness.

He developed that: Neither of Col. Swope's kidneys were normal and that one had a tumor two inches long. That if Col. Swope had died from uramic poison, there would have been convulsions and it would have been impossible to have located the poison. There was a tumorous growth in the intestines of Col. Swope. That Col. Swope's aorta was hardened from the arch below the diaphragm and that

in removing the brain from the skull Dr. Hektoen broke it on one side in at least a dozen places and tore the base of it.

Walsh then asked Dr. Hall if he did not tell him a few weeks ago that if he had been called upon to give the death certificate in Col. Swope's case that he would have ascribed the cause as senile debility.

"I did," said the witness. The witness said that he was unable to locate the course of the typhoid fever epidemic in the Swope residence it seemed to him, he testified, that the germs had been introduced in a mass by someone, but upon making a scientific examination, this suggestion made by Mrs. Swope, shocked him, said the pathologist.

Dr. Elmer Twyman testified that during the afternoon session that he made several tests for meningitis upon Chrisman Swope, and that none of them showed that he was suffering from this affliction. Dr. Hyde, contended that the cause of the young man's illness was meningitis, Dr. Twyman said. Tests for typhoid fever were readily responded to, said the physician.
